Talon XC Series

Talon DVR is a comprehensive digital video security management system that features advanced H.264 video compression that produces exceptional clarity and color while viewing recorded video.

Talon video management is an integral piece of a complete management system. Combining point of sale reporting and Talon's ability to search transaction data overlaid on video allows you to see the whole picture.

Talon DVR also offers flexibility for remote viewing from Internet Explorer, PC Client software or on your mobile phone with support from applications for iPhone, Android, and Windows Mobile.

Exceptional Clarity & Connectivity

Talon DVR by Ready, Inc
