

## Dining and Bar

Effortlessly manage table service and bars with comprehensive functionality that easily scales for any venue. Elegant and substantive floor plans display essential operations information while providing a gateway to an intuitive POS experience.

SoftTouch POS Element masterfully simplifies robust functionality for easy-to-use operation. Indispensable functions are strategically designed for optimal efficiency and standout features help power your eatery to unprecedented success.

Boosted by a private cloud infrastructure, SoftTouch offers POS services well beyond on-premises boundaries. Discover how element can transform your establishment into an operational paradise.

With more than fifteen years of maturity, SoftTouch POS continues to push the envelope of innovation. Element is the latest achievement by SoftTouch, the standard-bearer of POS technology.

## SmartHost™ Advanced Table Management

SmartHost table management solution is designed to eliminate labor. There is no need for a “roaming host” as all data is automatically collected through normal workflow operation. Moreover, our Predictive Seating technology provides accurate wait times that are intelligently based on historical and real-time statistics.
